

# How To Get Rid of Rats

Rats are small in size and make their shelter in small holes or spaces in our home. The reason why one should worry about rat infestation is that they carry disease and parasites.

## Catching the rat using a basic non-lethal wire cage

This method is safest and kindest to catch rats. You have to just put some food item inside the cage, the rat will come for the food and trap will close because of the moment caused by the rat.

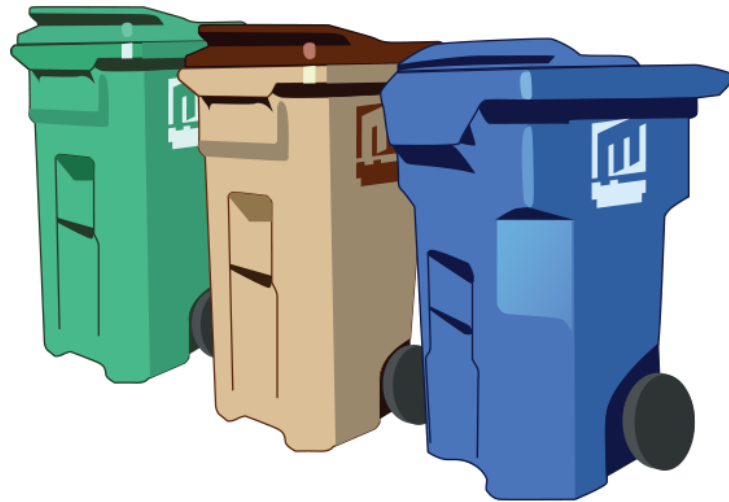

# Do not fall for rat repellents sound machine

There is no supportive evidence whether these machine works or not. Moreover, these type of machines is considered fraud by many people.

# Do not leave the food item and garbage open

Keep the food items close and do not throw food  
in your garbage. Rats feed themselves from it.
